

# Hybridization Instrument

## SH2000

### Description:

- ◆ SH2000 Hybridization Instrument can be setting constant temperature, time and etc. Instead of manual operation experiment, the accuracy of experiment is higher and result is more reliable than traditional manual experiment. Hybridization and degeneration can be operated at same time, which reduces experimental procedure and improves efficiency and accuracy of operation.

### Features:

- ◆ This instrument is adopted FISH processing step, which can reduce a lot of manual operating time and avoid the damage of harmful reagent.
- ◆ Touch screen allows for easy to read, program and use.
- ◆ Automatic power recovery function.
- ◆ Automatic cooling function after running over.
- ◆ Automatic warm-up function.
- ◆ Platform high precision of temperature control, low fluctuation.
- ◆ Can deal with 12 slides.
- ◆ Support 300 custom programs stored functions.
- ◆ Three operation modes: denaturation & hybridization, hybridization, multiple-step operation.
